

**Mounting instructions:
AVISION AHEAD-2 Junior Mask**

Picture 1

IMPORTANT: PICTURE 2. MOUNT THE MASK AS SHOWN WITH CLIPS FACING DOWN INTO THE BACK OF THE MASK ON THE HOCKEY HELMET.

“Do not mount so the clips hang above the mask. This will affect proper fit, performance and mask for protection.”

Picture 1 The pair of “J” bars to attach to each side of the temple area of the helmet. Remove helmet screws and mount the J-bars over the holes predrilled in helmet and replace the screws. Check all screws regularly. Note: All AVISION AHEAD masks come assembled with lens, clips, chin cups, straps and snaps attached to polycarbonate cage fame.

The Mask**

**Picture 3
The chin cup assembled to the mask.**

**Picture 4
Straps from chin cup and snaps mount to the sides of helmet.**

**Picture 5
Male post on helmet for snapping the mask chin strap to helmet.**

**Picture 6
Mask snapped to the helmet.**

IMPORTANT:

Make sure before play or practice you have fit the chin cup to your facial size. If the mask becomes dented, cracked or damaged in any way, replace it. It may not have its full protective capability if damaged. If the Lens should be damaged or loses its clarity from excessive scratches, discoloration or in any way impedes your vision for any other reason do not use and immediately replace it. Clean with water, 409 or Windex then rinse. Never put “antifog” on lens. Note; Consumers should use care to select a helmet and face protector combination and check identification of the helmets with which the face protector is intended to be used and fits properly, is comfortable, and is lightweight.
